Volume 104 1991

R. B. Campbell (Cedar Falls, Iowa)
On the Robustness of Regular Systems of Inbreeding 1
G. Eason (Glasgow, United Kingdom)
On a Simplified Model of the Renal Medulla 21
L. P. Lefkovitch (Ottawa, Ontario)
Vector Dissimilarity and Clustering 39
Alvin D. Wiggins (Davis, California)
Estimation of the Thermal Coefficient in the Decline
of a Bacterial Population Under Heat Stress 49
Natalia Trayanova and Craig S. Henriquez
(Durham, North Carolina)
Modification of a Cylindrical Bidomain Model for Cardiac Tissue 59
M. Basson and J. R. Beddington (London, England)
and R. M. May (Oxford, England)
An Assessment of the Maximum Sustainable Yield of Ivory
from African Elephant Populations 73
Anup Dewanji, Suresh H. Moolgavkar, and
E. Georg Luebeck (Seattle, Washington)
Two-Mutation Model for Carcinogenesis: Joint Analysis
of Premalignant and Malignant Lesions 97
Xiaodong Lin (Edmonton, Alberta)
Qualitative Analysis of an HIV Transmission Model 111
Mark Andersen (Irvine, California)
Properties of Some Density-Dependent
Integrodifference Equation Population Models 135

Announcement 158

Danny Summers, Zong Y. Wu, and Gary C. W. Sabin
(St. John's, Newfoundland)
Disturbed Nonlinear Multispecies Models in Ecology 159

Elsevier

A. G. Rigas (Xanthi, Greece)
Spectra-Based Estimates of Certain Time-Domain Parameters of a Bivariate Stationary-Point Process 185
A. S. Elkhader (Aberdeen, South Dakota)
Global Stability in a Synthrophic Chain Model 203
Grace L. Yang (College Park, Maryland) and
Chao W. Chen (Washington, D.C.)
A Stochastic Two-Stage Carcinogenesis Model: A New Approach to Computing the Probability of Observing Tumor in Animal Bioassays 247
Lea F. Murphy (Corvallis, Oregon) and
Steven J. Smith (Kirksville, Missouri)
Maximum Sustainable Yield of a Nonlinear Population Model with Continuous Age Structure 259
Joseph C. Watkins (Los Angeles, California) and
Birgit Woessner (Ulm, Germany)
Diffusion Models for Chemotaxis: A Statistical Analysis of Noninteractive Unicellular Movement 271

Book Review

M. R. Davenport (Vancouver, British Columbia)
Modelling Brain Function: The World of Attractor Neural Networks (Daniel J. Amit) 305
